

KRITIKER från utställningen:

1 Bl & tan dog, well grown and good bone for age, very nice front & feet, nice proportions with a long head & ears, nice balanced mover though very much a puppy, hindquarters naturally needs to muscle, nicely carried stern, very promising.

2 bl & tan, very nicely balanced puppy bitch, excellent bone & a very good shoulder, nice front & feet, very good muscle on hindquarters for her age and a nice balanced mover, pretty head with nice long ears and the furnishing will come with age, very promising.

3 Bl & tan with good pigmentation, very immature and will drop in body as he ages, very good bone and nice shoulder, hocks a little straight at moment but moved well, nice long head & ear with good expression, needs now more muscles on the hindquarters, a good stern.

4 Bl & tan, nice length of head and neck, good shoulders and well boned front, very nice feet, nice long head of correct width with nice ears, the furnishing needs to finish, a little straight in hocks but quite nicely muscled second thigh for age, a good balanced mover.

5 Bl & tan, nicely pigmented, very good bone, nice long head and good skull, nice feet, good muscled hindquarters for age and reasonable angulation, nice balanced mover but a bit loose in elbows witch will probably correct with age, rather round eye witch makes his expression a little hard.

6 Very impressive youngster, light bl & tan, excellent bone & body, very good length of neck, nice head with beautiful low set ears, good shoulder, fairly good angulation at the rear but hind movement not yet cordinated, unfortunately a undershot mouth but a very typical and well balanced specimen.

7 Bl & tan bitch, very overwhelming but standing naturally, is well blanched with good shoulder, excellent boned front and feet, nicely muscled quarters to her age and reasonably short angulated hocks, long head & ears, moved nicely when she got into her stride.

8 (Avelsklass valpar Hane) Bl & tan dog who's qualities in head, neck, shoulders and front are reflected in his puppies, all four puppies are the same type with the same good bone and length as their father, a consistent group of types.

22 (Avelsklass valpar Tik) Slightly different composed group, three of whom have more the type of father and one bitch like her mother, all well grown and typical but not quite so consistent in type as the dogs group.

Uppfödar grupp valpar Astors Kennel; Very nice consistent group of puppies with very similar types, all with nice front, bone, shoulder and neck, good long heads, plenty of scope, all immature as yet but will be very nice when they mature.

9 Bl & tan, very well grown with good bone & body, excellent front and elbows, well muscled hindquarters with good short hock, I should prefer a shorter back and tail carried a little high, good long head and ears with nice lip and moderate furnishing.

10 Liver & tan, top quality, very nice overall balance, very nice bone, good front and feet, very good length of back and nicely muscled hindquarters, beautiful head with excellent length, good furnishing and expression, nice long low set ears, moved well when his handler took it slowly.

11 very well pigmented bl & tan with a beautiful rich tan, well balanced with a good shoulder and deep body, well muscled quarters, head although of good length for his size needs a little more furnishing, teeth showing signs of age, in beautiful condition, hind movement a little uncoordinated.

12 Tall bl & tan with very good bone, slightly short in back witch unbalanced his profile, good neck, good length of head and well angulated quarters, good strong hocks, beautiful balanced mover, I would like little more furnishing on the head.

29 Bl & tan, nice outline though slightly short in back, deep body, good bone & shoulder, reasonable angulation at rear, good length of head and ears, would like more furnishing, balanced mover but a little bit close behind.

13 Richly pigmented bl and tan in beautiful condition for his age, good outline in profile, very good front and feet, good length of back and angulation of hindquarters, head has good length but I should like more furnishing and a little more lip, moved ver well with very easy and rhythmic movement.

30 Nicely balanced hound with plenty of bone and body, shorter in back than ideal but well angulated quarters and hocks, beautiful furnishing, head with extra good lip and long ears, well balanced front and nice feet, hind movement does not quite balance the front movement.

14 Beautiful blanket black dog, beautiful type, lovely head and expression, good balance of skull & foreface, very well set ears, good front and feet, very good proportions in outline with excellent length of back, well angulated quarters, in lovely condition and moved well. **BIS**

Här startar den officiella delen av årets Blodhunds Utställning:

Hanar (Dogs) Junior Klass 9-15 månader
